Claims 1 and 9 are rejected under 35 U.S.C. 102(b) as being anticipated by Webb.

In Figure 1 Prior Art of Webb 3 is a guide groove in the clamp arm, 17 is a clamp bolt, 19 are washers with rotation restriction ribs, and 13 and 15 are nuts.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 7 and 10 are rejected under 35 U.S.C. 103(a) as being unpatentable over Webb in view of Shivers et al.

Shivers et al teaches that a clamp pad may be swivel mounted to the clamp bolt. Shivers et al further teaches that the clamping bolt may have a tool engaging socket. To provide in the Webb clamp bolt a swivel mounted pad and a tool engaging socket would have been obvious for one skilled in the art at the time the invention was made in

view of the disclosure of Shivers et al. One of ordinary skill in the art would have been motivated to do this in order to clamp an irregular workpiece and to provide a convenient means to rotate the clamp bolt with an existing external tool such as an allen wrench.
